

About us

ADDACTIS Worldwide is a global network delivering first class actuarial services and software for the insurance and reinsurance sectors alike, with subsidiaries in Belgium, Netherlands, Spain and Colombia, and partnerships in Europe, Africa and Asia.

ADDACTIS Libraries team is located in Brussels and is dedicated to developments, controls and communications of ADDACTIS network models regarding Solvency 2 subjects, modeling in Life and Non-Life insurance, analytics methods, financial issues etc.

The team aspires to increase their consulting offer. For this reason the team is looking for an actuarial consultant to support the local consulting team.

Missions

You will actively take part on the following ADDACTIS Libraries team's work:

- By helping development of libraries and sales:
 - Creation of new components (models, modules or functions) with ADDACTIS Modeling®
 - Controls and evolution of current components in order to maintain high quality of developments and services
 - Modeling missions related to libraries components
- By contributing to the distribution of software and communication, support and trainings linked to libraries components:
 - Training and presentations in our local offices or in our clients offices regarding hot business topics, new libraries components or ADDACTIS Software features
 - Support on writing commercial proposals
 - Attendance at external events such as international business meetings and conferences, as well as internal events such as an ADDACTIS breakfast or for internal committees
- By participating to R&D:
 - Contribution to the regulatory and technical watch regarding modeling topics
 - Participation with writing scientific papers

You may also work on transverse modeling missions in order to support local offices or partner consultants.

Required profile

We are looking for a young graduate in actuarial science or mathematics with a first professional experience up to 2 years, ideally in non-life insurance, and who has the following skills.

■ Technical skills:

- Knowledge on non-life insurance issues, Solvency 2 regulation, statistics, financial and actuarial mathematics methods
- Modelling oriented
- Expertise on usual actuarial tools like: Excel, VBA, R, SAS, etc.
- Familiar with modeling software such as: ADDACTIS Modeling, Prophet Professional, Moses or MatLab

■ Spoken languages:

- Everyday English
- Use of another foreign language such as Spanish, Chinese or Arabic is a plus

■ Personal aptitude:

- Keen on IT issues and new technologies
- Very good communication skills, comfortable making oral presentations
- Rigorous and reliable professional approach
- Ability to adapt with little guidance
- Creative, open minded and dynamic
- Motivated to work in an international environment with frequent business trips

Practical modalities

The job will be based in Brussels.

Frequent travel abroad are planned.

To apply, please send your resume and cover letter to recruitment@addactis.com
